

2018 Course Release Schedule

Updated 7/9/18

February

Course: Security+ 2017 - RELEASED

Exam: SY0-501

Description: This course will also increase one's employability in IT security-related jobs, through preparing students to take and pass the CompTIA Security+ certification test. Specific topics covered include: security threats, attacks, and vulnerabilities, tools and technologies, architecture and design, identity and access methods, risk management, and cryptography.

April

Course: MTA Java - RELEASED

Exam: 98-388

Description: The MTA Introduction to Programming Using Java (98-388) course is excellent for someone wanting to learn how to code in Java, a powerful object-oriented programming language. This course will also help students get ready to pass the MTA 98-388 exam and improve employability prospects for any software development position requiring Java coding skills. Specifically, this course covers Java fundamentals, data types and variables, flow control, object-oriented principles, and compiling and debugging code. These concepts are covered through simulating writing code for an online store, thus adding a real-life scenario to this course.

May

Course: Network+ 2018 - RELEASED

Exam: N10-007

Description: This course will prepare students to take and pass the CompTIA Network+ exam, a huge step in employability for network administrator and similar positions. This course will cover networking concepts, infrastructure, networking operations, network security, and network troubleshooting.

July

Course: MTA Networking - RELEASED

Exam: 70-366

Description: This course serves as an introduction to networking concepts and is taught through the eyes of an IT professional about to take on the role of a junior network administrator for a small Windows-based network. Specific topics include: network infrastructure, network hardware, and protocols and services.

Course: Developing ASP.NET MVC Web Applications

Exam: 70-486

Description: This course will teach students how to build robust web applications using ASP.NET and the model-view-controller (MVC) pattern. Specifically, this course will cover application architecture design, designing and developing the user experience, troubleshooting and debugging web applications, and designing and implementing security.

Course: MTA Server (updated for Windows Server 2016)

Exam: 70-365

Description: This course will introduce students to the setup, configuration, and maintenance of Windows Server 2016. Specific topics include: server installation, server roles, Active Directory, storage, server performance, and server maintenance. This course is themed toward someone who is moving into a junior server administrator role.

August

Course: Android Certification with iOS

Exam: AND-401

Description: This course will introduce students to building mobile apps specifically for the Android and iOS platforms. Languages and development kits for both platforms are covered.

Course: MTA Cloud Fundamentals

Exam: 98-369

Description: The MTA Cloud Fundamentals course will prepare students for the 98-369 exam. Topics in this course include: Understanding the cloud, working with Microsoft cloud services such as Office 365 and Microsoft Intune, and supporting cloud users.

Second half of 2018

Courses: New Adobe CS courses for the 2018 versions of Photoshop, Illustrator, InDesign, Dreamweaver, Premiere, and Animate

Exams: TBA

Description: To be updated as details are released on the new series of exams.

Other course series coming in the second half of 2018 include:

MCSA for Windows 10 (two courses)

MCSA for Windows Server 2016 (three courses)

QuickBooks Online
