

LearnKey Selected by Fiji Institute of Technology and Fiji Rugby Union to Educate Players in Digital Technology

– New agreement part of program to prepare Fiji's rugby stars for life after the game –

St. George, UT—May XX, 2006—LearnKey, Inc. a global provider of online learning systems, today announced an agreement between the Fiji Institute of Technology (FIT) and the Fiji Rugby Union (FRU) that will provide Fiji's national rugby teams access to LearnKey's e-learning programs to increase their technology literacy and education.

The joint venture between LearnKey's strategic partner LearnKey New Zealand and FIT mirrors the evolution of sports and technology, as FRU players will be better prepared for life after sport. The effort exemplifies LearnKey's goal of training and educating the communities and youth of the world. In exchange for the training, FRU players will promote FIT and LearnKey.

"The people of Fiji are very outward bound, very interested in excelling as a culture not just in everyday life but in their passions such as rugby and personal education," said John Clemons, LearnKey Founder and CEO. "They see the global value in being technologically literate and we are immensely pleased that LearnKey's courses can help the rugby teams and students at the Fiji Institute of Technology achieve that objective."

"The sevens boys are blessed to be the first group of rugby players to participate in this LearnKey Training Course provided by FIT," said Waisale Severi, Fiji sevens player-coach and international rugby superstar. "We have a lot of young boys on this team and this is a huge advantage to them as apart from rugby, they'll now have a chance at upgrading their computer knowledge for their future."

"This program is aimed to enhance the national teams' information technology literacy skills," said FIT director Kolinio Meo. "LearnKey's e-learning technology and online learning solutions are remarkable because they are self paced learning courses and programs."

"Whether they're our rugby heroes or FIT students, going through the LearnKey program and furthering their abilities will eventuate a lot of opportunities throughout their lives," Meo said. "They'll be more confident and prepared for life with what they've learned."

The courses begin immediately for Fiji's world champion sevens team, and will start for the fifteens team when international competition begins. The agreement runs through the end of 2006.

In the future, LearnKey will be providing production materials and guidance to FIT students who will create their own documentaries and instruction videos on Fiji culture and traditions. The program will help ensure that many of the ancient Fijian tribal customs that are at risk of being lost can be visually preserved to educate future generations.

About Fiji Institute of Technology

Fiji Institute of Technology (FIT) is one of the largest technical and vocational institutes in Fiji, with over 20,000 full time students enrolled. It has four campuses and more than sixty franchised centers to meet growing demand. Courses offered at FIT range from graphics arts & culture to building and civil engineering, culminating in trade certificates, diplomas or advanced degrees.

About Fiji Rugby Union

The Fiji Rugby Union (FRU) is based in the nation's capital of Suva and administers rugby, Fiji's most popular sport, over the nation's 14 provinces. The FRU comprises 36 affiliated unions and associations, each with their own administration and constitution. There are 13 unions in Viti Levu, five in Vanua Levu, with the remaining 18 on outer islands. FRU is a member of the Pacific Islands Rugby Alliance (PIRA) along with Samoa and Tonga.
